DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Miller et al (5,930,231).

Regarding claim 1, Miller discloses a method of transferring the contents of an information channel from a source to a destination comprising providing at the source a spectrum having a plurality of channels; selecting one of the channels, resulting in a selected channel; digitizing the spectrum, resulting in a digitized spectrum; from the digitized spectrum, isolating and translating the selected channel to baseband, resulting in a digitized channel; framing the digitized channel and associated attribute information, resulting in a framed channel; transmitting the framed channel to the destination using packet techniques over a packet network; and reconstructing a frequency and bandwidth accurate replica of the selected channel, resulting in a reconstructed replica of the selected channel at the destination (see abstract; figures 8-9; col. 7, lines 7-26).

Regarding claim 2, Miller discloses the framed channel is merged with other digital services during transmission over the network (see enhanced services in col. 6, lines 36-42).

Regarding claim 3, Miller discloses demodulating the reconstructed replica at the destination (see demodulators in figures 6 and 7).

Art Unit: 2661

Regarding claim 4, Miller discloses the selected channel corresponding to a telephone service (see col. 3, lines 49-59).
